

Faq-o-matic.net joins the Altaro Community Outreach Program (ACOP)

To celebrate the faq-o-matic.net 5 year anniversary with 25 FREE Oops!Backup™ licenses

January 20, 2010 - Valletta, Malta: Altaro Software, a new company aiming to be one of the leaders in the global backup and versioning software industry, is pleased to announce the membership of faq-o-matic.net as part of the ACOP group. Faq-o-matic.net is a German community blog that focuses on Windows based networks.

The ACOP group (Altaro Community Outreach Program) is an initiative aimed at assisting online IT communities that help thousands of people every day for free.

Altaro is pleased to present to Nils Kaczenski, Microsoft MVP (Most Valuable Professional), IT consultant and editor-in-chief of the Germany based faq-o-matic.net (www.faq-o-matic.net), 25 FREE Oops!Backup licenses to celebrate the 5 year anniversary of the faq-o-matic.net community blog.

"Faq-o-matic.net, with over 50 authors is an extremely valuable resource for the IT community in Germany. We at Altaro are pleased to have faq-o-matic.net as part of the Altaro Community Outreach Program and look forward assisting the faq-o-matic.net community over time. Through the ACOP we will be helping faq-o-matic.net increase their brand coverage – and the assistance they provide - by leveraging our software." says David Vella, CEO, Altaro Software.

As of today, faq-o-matic.net has more than 50 authors that regularly write about topics and issues related to Windows-based networks. Faq-o-matic.net started in February 2005 and has 100,000 visitors using the blog every month. Faq-o-matic.net will be giving away the free licenses starting from 1st February 2010 over a period of 5 weeks through the website www.faq-o-matic.net.

Nils Kaczenski says: *"We like the way Oops!Backup came into the world with a community-driven beta program. As a leading online community faq-o-matic.net aims at giving IT professionals support in their jobs. They need solutions that work and very often they are willing to give something back to the community. They can, helping in IT forums or as authors on blogs like ours. Now, after five successful years with our IT authors blog faq-o-matic.net the ACOP assists us to give something back to our readers. I am certain they will be as convinced of Oops!Backup as a document recovery solution as we are."*

Altaro Software urges communities interested in ACOP to visit the Altaro ACOP site at <http://www.altaro.com/community-outreach-program.php> for more information about the program.

About Oops!Backup

Oops!Backup is a Backup and Automatic Versioning solution for documents, images and other files which automatically tracks changes to user-generated content. Oops!Backup is unique in that it not only backs up and recovers the most recent version of a file but also allow users to go back in time and very easily restore older versions of their work - that is, it stores a historical record of the different changes made to a file in that file's lifespan.

About Altaro Software

Altaro Software, a young company based in Malta Europe, employs enthusiastic people who understand that one way to innovate is to take a step back from the implementation details and ask three important questions: How does it work?; Why is it done like that? and most importantly: Says Who? Through answers to these questions we can break through complacencies in problem-solving and what is sometimes wrongly referred to as 'Common Wisdom' – the acceptance of something as is just because everyone does it that way. This philosophy is represented in Altaro's first product – Oops!Backup. For more information about Altaro Software and Oops!Backup visit the Altaro website at <http://www.altaro.com>
